PROFESSIONAL SUMMARY

Web professional with 8+ years leading website builds end-to-end across WordPress/Elementor and Squarespace from client requirements through design, build, QA, and launch. Comfortable owning client conversations (estimates, timelines, tradeoffs), partnering closely with design, and holding a high-quality bar on visual and technical detail. Picks up new stacks quickly (JSON-based platform configuration, AWS), has trained and onboarded new hires as a team scaled, and uses AI tools daily to move faster without cutting corners.

CORE SKILLS

Web Builds & CMS: WordPress, Elementor, WPBakery, Squarespace, HTML, CSS - comfortable learning new platforms and frameworks fast

Client & Project Ownership: Scoping to launch, requirements gathering, estimates/timelines, direct client communication

Design Partnership: Banners, icons, cards, template design (Canva), visual/UI consistency, stakeholder review

Team Growth: Trained and onboarded new hires as a team scaled from sole contributor to a growing team

AI Tools: Daily use for research, content drafting, QA, and documentation; responsible/verified usage

Other: GA4, Google Tag Manager, basic SEO, AWS (EC2, S3, IAM, DynamoDB, SNS), QA & testing

Working familiarity reading and troubleshooting JavaScript and React code (non-developer level)

PROFESSIONAL EXPERIENCE

Technical Solutions Engineer - Apps4Org Software, United States (Remote)

September 2017 – July 2026

- Led the company website end-to-end using Elementor from requirements through build, QA, and launch cutting page load time from 13s to under 5s (60%+ improvement) and implementing GA4, Google Tag Manager, basic SEO, and reCAPTCHA.
- Led client website builds independently on Squarespace, owning the conversation from initial design and scope through launch and ongoing support.
- Partnered directly with design on visual assets (banners, icons, login screens, sponsor placements), developing 3-4 template concepts per project and pushing quality through stakeholder review rather than just executing a brief.
- Held the quality bar across every deliverable structured, brand-consistent content and pixel-level visual polish across all client-facing pages.
- Use AI tools daily to move faster on research, drafting, QA, and documentation while verifying accuracy before anything ships.
- Picked up JSON-based platform configuration from scratch to set up multi-platform event technology (mobile app + cloud dashboard), translating client requirements into working features such as lead generation and badge/certificate generation.
- Owned end-to-end QA across web, mobile app, and cloud platforms; traced defects to root cause and coordinated fixes with the development team.
- Delivered live, real-time client support during events comfortable being the direct point of contact under time pressure.

PROFESSIONAL PROJECTS

- Website Revamp Project - Redesigned and restructured company and client websites on WordPress and Squarespace, improving usability, content clarity, and page performance.
- Event Platform Configuration - Set up and tested mobile app and cloud dashboard features end-to-end for client events, from content intake through live event support.

EDUCATION

Bachelor of Engineering, Electrical and Electronics Engineering

Loyola Institute of Technology and Science, 2013

Diploma in Computer Application, 2009

Hardware and Networking Certification, 2009
